

Security Recommendations

High Priority Recommendations

- Implement least privilege access controls
- Deploy encryption for customer payment data
- Install and configure an intrusion detection system (IDS)
- Develop disaster recovery and backup procedures
- Introduce centralised password management

Medium Priority Recommendations

- Improve password complexity requirements
- Establish formal maintenance schedules for legacy systems
- Review employee access permissions regularly

Compliance Recommendations

- Improve PCI DSS compliance controls
- Strengthen GDPR data protection processes
- Conduct regular security audits and risk assessments
